#24 GET Edit Product #2

Buka kembali halaman **admin_products.js** dan buatlah baris kode dibagian bawah halaman melanjutkan kode sebelumnya kita akan membuat **Method Get Edit Product** sbb:

```javascript
// GET edit product

router.get('/edit-product/:id', function(req, res) {

  var errors;

  if (req.session.errors) errors = req.session.errors;

  req.session.errors = null;

  Category.find(function (err, categories) {

    Product.findById(req.params.id, function(err, p) {
      if (err) {
        console.log(err);
        res.redirect('/admin/products');
      } else {
        var galleryDir = 'public/product_images' + p._id + '/gallery';

        var galleryImages = null;

        fs.readdir(galleryDir, function(err, files) {
          if (err) {
            console.log(err);
          } else {
            galleryImages = files;

            res.render('admin/edit_product', {
              title: p.title,
              errors: errors,
              desc: p.desc,
              categories: categories,
              category: p.category.replace(/\s+/g, '-').toLowerCase(),
              price: p.price,
              image: p.image,
              galleryImages: galleryImages
            });
          }
        });
```

```
        }
    });

  });
  });
```
